qpp

quantum paradigms of psychopathology the first international symposium

To: QPP Advisory Board Members

RE: Fourth Target Article

The QPP Scientific Program Committee is pleased to announce that, in addition to the three target articles exploring "Quantum Paradigms of Psychopathology" already planned for publication in the March 2010 issue of Neuroquantology, a fourth target paper will also appear in that same issue. The new target article, a contribution by Nancy Woolf, Jack Tuszynski, Travis Craddock, and Douglas Frieden, is attached to this email as a pdf document for your perusal. You should already have received pdf versions of the first two target papers as attachments to a prior email. The third target article, to be attached to another separate email, is in the final stages of preparation by Gustav Bernroider and will be sent to you shortly.

As previously indicated, in the same issue of Neuroquantology, we also plan to include commentary on all the target papers. Toward that end, your expertise concerning the subject matter of the four target articles remains crucial to our efforts, and we still hope that you will contribute your insights in the form of commentary to be included in the QPP section of Neuroquantology's March 2010 issue. If you wish to publish your comments along with our target papers in Neuroquantology, please feel free to send the text of your remarks to me at donald.mender@yale.edu before January 15, 2010.

We would also like to remind you of an opportunity for those interested to submit relevant abstracts for possible live presentation at a concurrent session on quantum paradigms of psychopathology planned as part of the TSC 2010 meeting at the University of Arizona in Tucson. These abstracts may be submitted through the conference website (www.consciousness.arizona.edu/) before the submission deadline on 12/15/09.

As always, your continuing participation in the QPP initiative is greatly appreciated.

Sincerely,

Donald Mender, M. D.
QPP Corresponding Secretary
